

SHEET METAL FOLDER

RED-2700 / 1,0 mm/ 160

Manual bending machine with cutouts in beams, with the possibility of finishing the bending of window sills from three sides. Bends 6 cm up and 6 cm down. This modern bending machine has a lot of space inside the machine and a narrow bending beam of 15 mm. The offered Red 2700 / 1.0 bender is an alternative to the segment bender for less complex bends. This possibility is obtained thanks to the construction with special cut-outs. The advantages of this bending machine include high bending efficiency while maintaining precision and repeatability of machining. Designed for processing steel, aluminum and other sheets. This folding machine is extremely functional.

Specifications

Maximum working width: 2580 mm

Bending capacity: up to 1.0 mm (steel sheet)

All non-ferrous metals have 30% more bending force

Bending angle: max. 160 degrees

Cutting with roller scissors over the entire working width

Bending beam thickness: 15 mm

Lifting the upper beam in three positions

Max. opening: 80 mm

Protractor

Angle stop to 90 degrees

Rear bumpers

Front depth stops

Weight: approx. 490 kg

Shears (max cutting capacity 0.8 mm / steel)

The machine complies with CE guidelines and has a 12-month warranty.
