

SHEET METAL FOLDER RED-PLUS 1400/1.2/160

Thanks to the implementation of the foot mechanism, the possible applications have been extended. You can bend the sheet in any position tools and you don't have to constantly reach for the clamping lever on the right side of the machine. This increases both the accuracy and speed of positioning the workpiece at the bend edge. You can bend sheet metal on three sides with this foot-operated bender. High quality workmanship and attention to detail of all elements ensure reliable and long-term use of this modern sheet metal bender. The construction of the machine provides space for processing at a height of 6 cm up and down.

Specifications

Maximum working width: 1400 mm

Bending capacity: up to 1.2 mm (steel sheet)

Bending angle of the bending machine: 160 degrees

All non-ferrous metals 30% more bending capacity

Bending edge: 15 mm

Cutting with roller shears over the entire working width

Max. opening: max. 80 mm

Degree scale

Weight: approx. 220 kg

The machine complies with CE guidelines and has a 12-month warranty
