

SEMI AUTOMATIC SHEET METAL FOLDER ZGH-2140/3.0

Semi-automatic press brake ZGH-2140/3.0/140*

Semi-automatic bending angle, is set on the encoder and potentiometer

The press brake works like a semi-automatic machine.

After bending, the cheek returns to the starting position and the pressure cheek returns to the set height. It is set to 10mm.

This sheet metal folder is suitable for series production.
