

HYDRAULIC SHEET METAL FOLDER ZGH-2140/3.0

A professional press brake is a folding machine with a working area of 2.14 m. Possible sheet metal thicknesses to be processed by the folding machine: sheet steel up to 3 mm, sheet aluminum up to 4.0 mm. The two cheeks of the folding bench are CNC-milled from solid material and ensure a long service life. The sheet metal bender has a holder for the cut sheet metal at the outlet and a protractor at the front. With electricity 3 KW – 400 volts

Specifications

The maximum working length of 2140mm

Thickness of steel sheet up to 3.0mm

Upper beam aperture: 80mm

Bending angle of 145 degrees

Desktop control

CE marking

Weight of about 1000 kg
