

MODULAR SHEET METAL FOLDER

ZGM-2140/1.2

Modular sheet metal bender, bending machines in this group consist of 2 to 6 modules, 80 cm each, which increases stability during the bending process. The sheet can be placed in the center of the bending machine (bottom). The upper beam of the press brake is closed from the sides and top. Many complex operations can be performed with this machine. The maximum sheet thickness of the bending machine is up to 1.2 mm of steel sheet. Available in lengths from 1 m to 4 m. This bending machine has a robust clamping arm that provides adequate clamping force. The bending beam of the machine is hinged in some places and has gas springs.

Specifications

The maximum working length: 2140 mm

Bending capacity: 1.2 mm (steel)

Bending angle: max. 140 degrees

Upper opening: 80 mm

The sheet metal bending machine can be dismantled and transported in parts

Weight: approx. 1000 kg
